

# For Women With...

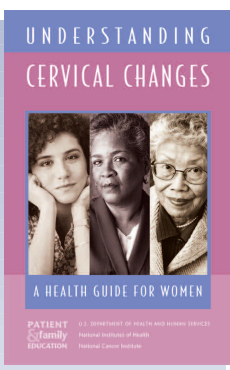

## Abnormal Mammogram or Pap Test Results

Waiting for follow-up results can be an anxious time for many women. These booklets inform women that not all breast or cervical changes mean cancer.

### Understanding Breast Changes describes:

- Common breast changes at various life stages
- Types of follow-up testing
- Types of biopsies
- Key questions to ask your doctor
- Medical terms and their meanings

### Understanding Cervical Changes describes:

- Pap and HPV testing
- Interpreting abnormal test results and next steps
- Importance of follow-up
- Treatment for cell changes
- Key questions to ask your doctor
- Medical terms and their meanings

To order free copies, call the National Cancer Institute's Cancer Information Service toll-free at:  
**1-800-4-CANCER (1-800-422-6237)**

**TTY: 1-800-332-8615**

To order or view online, go to [www.cancer.gov](http://www.cancer.gov) and click on "NCI Publications."

# For Men With...

## Prostate Problems

Not all prostate changes mean prostate cancer. In fact, many changes in the prostate are a natural part of aging. An NCI resource is available to help men understand common non-cancerous conditions and information about prostate cancer.

### Understanding Prostate Changes describes:

- Prostate changes that occur with age
- Prostatitis and BPH: symptoms and treatment options
- Prostate cancer: facts, symptoms, risk factors, and prevention
- Key questions to ask the doctor
- Types of tests
- Medical terms and their meanings
